The advantages of aluminium over timber are many; our aluminium will not rot, or warp in the sun, split, crack, flake or peel.

We work with higher tolerances in aluminium than in timber so the end product is precisely manufactured.

Our design and manufacturing team will help you realize your vision and with over 80 powder coat colours to choose from, there is no one better than us to entrust your project to.

# Aluminium Screens, Window Awnings & Operable Louvres

At **Complete Barrier Solutions** we offer a great range of Aluminium privacy, louvred and awning screen options suitable for any budget.

Our aluminium screens and awnings are an in-house manufactured product. They are powder coated, which means a quality product lasting a lifetime with minimal maintenance.

Whether it's domestic or commercial privacy screens our team can cater to your requirements.

## Louvre Awnings Fixed or Operable

This interlocking awning system uses an Aerofoil Louvre blade. This provides an attractive awning in step with modern architectural design whilst at the same time similar in appearance to tradition awning systems. For more contemporary applications the multi panel or bi-fold operable system offers privacy, security and still captures the cooling breezes.

Other options of privacy screens are our premium "Knotwood" range. These timber look slats are fitted in a unique fixing system. If you're looking for a timber look without the high maintenance, then this style is for you.

## Aluminium Screens and Awnings

Screen, louvres and awnings are slim in design, adding security to your property. Horizontal or Vertical slat or louvre screens and awnings are available to suit individual designs.

These panels are welded with an option of 9mm or 20mm spacing's between

slat panels. These are also suitable for gates, boundary fencing and infill panels between brick piers.
