Abrasive Blasting & Powder Coating

Complete Barrier Solutions has over 70 standard colours available in contemporary colours, pearlescent and textured pearlescent colours.

We have the ability to match Colourbond® steel colours.

Colour charts are available upon request or visit www.duluxpowders.com.au to view online.

Abrasive blasting & powder coating

At Complete Barrier Solutions we offer an Abrasive Blasting Service where we are able to blast to a 2.5 grade finish or better.

All manufactured items are welded and submerged in a chromate solution prior to powder coating for superior corrosion resistance and finish.

Whether Domestic or Commercial applications, our modern equipment and highly professional staff have the ongoing commitment to improve our products and services. This enables us to consistently carry out your projects to a very high standard.

Our Powder Coated colours are cured in a large 7.2 x 2.4 x 2.4 metre oven, with no item being too small for our Powder Coating Service.

We are able to sandblast and powder coat items ranging from the old worn out ride on lawn mower deck to rusty aluminium tables and chairs; even motorcycle or car parts, antique cream cans or the hobbyist's projects aren't a problem for our professional team.
